Cos'è IN-FIX?

IN-FIX è un sistema di fissaggio brevettato **AUTOBLOC-CANTE** per scaffalature componibili.

Perché IN-FIX?

- Rapidità e praticità di montaggio grazie agli innesti conici;
- Componibilità a 90° e a 360°, che consente il miglior sfruttamento possibile dello spazio disponibile con una gamma completa di ripiani;
- Stabilizzazione automatica della struttura in funzione del carico (non sono quindi necessarie le croci stabilizzatrici);
- Robustezza e qualità nella lavorazione, design elegante ammorbidito dagli arrotondamenti;
- Igiene assoluta, grazie alle caratteristiche del materiale impiegato, **acciaio inox 18/10**.

What is IN-FIX? IN-FIX is a patented **self-locking** fixing system.

Why IN-FIX?

- IN-FIX provides for a simple and time saving method of assembling and disassembling shelving as required;
- It also allows for shelving to be constructed in angles of 90 and of 360 degrees which maximises use of the space available;
- The structure is automatically stabilised when load is placed upon it, therefore eliminating the need for any cross bar;
- IN-FIX further provides sturdiness and quality of manufacture which includes rounded off corners;

Was ist IN-FIX?

IN-FIX ist ein patentiertes Regal-Befestigungs-System.

Warum IN-FIX?

- Einfache und schnelle Montage durch das Klemmkegel System;
- Einsatzfähigkeit in allen Bereichen;
- Hohe Belastungsfähigkeit ohne Anwendung von stabilisierenden Kreuzstreben;
- Gelungenes Design mit abgerundeten Ecken;
- Optimale Hygiene durch den Einsatz von **Edelstahl 18/10** und Erfüllung der HACCP Norm.

Qu'est ce que le système IN-FIX?

IN-FIX est un système de fixation pour étagères, breveté, **AUTOBLOQUANT**.

Pourquoi IN-FIX?

- Simplicité et vitesse de montage grâce aux pièces coniques d'assemblage;
- Système modulable à 90° et à 360° pour une utilisation totale de l'espace avec une gamme complète de tablettes;
- Stabilisation automatique de la structure avec la charge (pas de croisillons nécessaires);
- Robustesse et qualité de travail, design élégant avec coins arrondis;
- Hygiène absolue, grâce aux caractéristiques du matériel employé, **acier inox 18/10**.

• Hygiene compliance is achieved through the nature of the materials used, **stainless steel 18/10**.

Les étagères modulables **IN-FIX "ECOline"** sont réalisées dans deux versions de base:

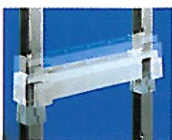

ECO-INOX

Scaffalature modulari, componibili, realizzate con struttura portante in tubolare di acciaio inox 18/10 e ripiani forati in polipropilene modulari in lunghezza da 300 e 400 mm. I ripiani sono facilmente lavabili anche in lavastoviglie. Dotate di piedini o ruote è possibile completarle con diversi accessori come: ganciere, cestelli, ecc.

The ECO-INOX range of shelving units has a tubular stainless steel frame work (18/10), into which fit perforated modular panels in polypropylene in both 300 and 400 mm long modules. These modules are removable and can be placed within any commercial dishwashing unit. The shelving system comes complete with adjustable feet, or castors, and in addition, a full range of accessories in the form of hooks and baskets are available to order.

Die Eco-Inox Regale bestehen aus Edelstahl 18/10 und gelochten Polypropylen-Fachböden. Diese Kunststoffböden mit einer Länge von 300 und 400 mm sind zur Reinigung in einer Spülmaschine geeignet. Alle Regale sind mit höhenverstellbaren Fußplatten ausgestattet. In Verbindung mit lieferbaren Rollen lassen sich aus diesem System Regalwagen aufbauen. Zubehörteile wie Haken und Körbe runden das Programm ab.

Etagères modulables réalisées avec une structure tubulaire en acier inox 18/10 et des tablettes perforées modulables en polypropylène de 300 et 400 mm lavables en machine. Les étagères sont dotées de pieds réglables et roulettes et peuvent être complétées avec différents accessoires: crochets, corbeilles...

ECO-COLOR

Scaffalature modulari, componibili, realizzate con struttura portante in tubolare di acciaio con verniciatura (colore: grigio chiaro RAL 7035) atossica in polvere epossidica antigraffio CON GARANZIA 10 ANNI SULLA RUGGINE. Ripiani forati in polipropilene modulari da 300 e da 400 mm.

The ECO-COLOR range of units has a tubular epoxy coated steel frame, both non toxic and scratch proof (colour: light grey RAL 7035). The frame work is guaranteed 10 years against rust and can receive perforated modular panels manufactured from polypropylene in 300 and 400 mm long modules that can be removed and placed in any commercial dish washing system.

Die ECO-COLOR Regale bestehen aus einem galvanisch-behandelten Stahl mit einer kratzfesten antitoxischen Pulverbeschichtung (Farbe: Hellgrau RAL 7035). Auf die Korrosionbeständigkeit vergeben wir ein Garantie von 10 Jahren.

Etagères modulables réalisées avec une structure tubulaire en acier traité epoxy (couleur: gris clair RAL 7035) avec 10 ans de garantie et des tablettes perforées modulables en polypropylène de 300 et 400 mm.
